## MISCELLANEOUS.

## FIGHTING A ROBBER.

WAS IT BRAVERY OR WAS IT A CASE  
OF FOOLHARDINESS?A Struggle With the Famous Ed Dalton  
For the Possession of a \$5,000 Money  
Package—A Telegrapher's Story of One  
Winter Night's Experience.When I read of adventures, there comes to my mind my encounter with a notorious outlaw of the name of Ed Dalton. For years he had robbed mail coaches and waylaid and murdered travelers who were belated and so unfortunate as to meet him.I was employed by the Northern Pacific railway as telegraph operator. It was in the latter part of the winter that the most terrible storm broke upon that section of the country that was ever known. The wind blew a strong gale from the northwest, and the air was full of snow.All trains were late, and I had found no time to leave my office and take an express package of \$5,000 to the bank for safe keeping. The station was crowded and our safe small, so that I usually deposited the company's money in the bank—not hating to risk it in the office. I had an order from the dispatcher not to go to bed till after No. 4 had passed. This was the western bound limited, due at Cameron at 10 minutes of 11.It was a lonely night. The wires hummed and sobbed in the wind as though they could not withstand the fury of the storm. I had finished my work and was sitting half asleep near the stove, which was filled with coal and red as a cherry, when a sensation of some impending danger took possession of me. Trying to shake it off, I walked to my desk, threw open the key and asked the operator on the "night trick" at Hudson how No. 4 was."On time," clicked the instrument in reply, and I stirred the fire, turned the blaze of my lamp higher and sat down again.For 15 or 20 minutes I sat listening to the monotonous click so musical to the operator's ear, when I became conscious some one was looking through the window, and a thought of the express package flashed through my mind. At the same instant a crashing of glass was followed by a gruff voice saying:"Move and you are a dead man!"I did not stir, but I realized that I was looking straight into a six shooter. While I was wondering how I could save the money the robber broke out the rest of the window pane and crawled in over my desk.Oh, for some way to reach my trusty "bulldog," which was lying in full sight under the ticket window. Useless wish! Ordering me to rise, the ruffian calmly took my chair and proceeded to warm his chilled members before "cleaning out" the office, all the while keeping the revolver pointed at my head. Glancing around, he sped my pistol and coolly put it in his pocket. As he rose he said:"Well, now I am ready for business. I will just trouble you for that little package with the red seals that is in your safe."I was desperate enough to say anything and broke into a loud, harsh laugh as he finished."Was ever anything more lucky?" I cried, and my voice sounded like a croak."Why, my friend, I have been waiting for a chance to rob the express company for a month, and if you are bound to take the package we will divide the contents and skip together."He looked at me a moment with a skeptical sneer."Bosh! Don't talk stuff! Whatever you do be quick about it and look a little out that you play me no trick, or I'll finish you."I turned the combination and drew the safe door open, masking up my mind to throw myself upon him if he moved his revolver away for an instant. It did not seem likely that opportunity would favor me, but as I took the money from the safe and handed it to him he lowered his weapon.The critical time had come! If I should fail to overpower the fellow, it meant death for me.I sprang upon him with the strength of a madman, and so unexpected was the movement that we both went sprawling on the floor, the revolver discharging itself harmlessly as we fell. The robber soon struggled to his feet, and lifting me completely from the floor forced me through the ticket window.But I had wrestled often while at college, and as I crashed through the glass I whirled him around, throwing my left foot back of his in such a way that the next instant found him on his head in a corner. Wild with excitement, I pinned him to the floor, pulling my old "bulldog" from his pocket and changing the situation by placing the muzzle against his temple."Lie still, my friend," I panted, "or it will be worse for you!"At that very moment I heard the familiar whistle of No. 4, which was approaching the station, but would not stop unless signaled. I was master of the situation now. I could stretch out my left hand and touch the signal board, and with a loud cry of triumph that sounded strange and savage in my own ears I turned it. I heard the airbrakes and escaping steam, and then the train came to a full stop. Directly afterward the office door opened, and the conductor came swinging his lantern and expecting his train orders.I suppose he understood the tableau before him, but that was all I knew for some time.When I became conscious of what was going on around me, they had my robbery bound hand and foot, and an eager crowd stood round my chair, praising my bravery and congratulating me on saving the large sum of money and capturing the bold robber west of Carson, the famous Ed Dalton.Was it bravery? Sometimes I think it was foolhardiness, but it paid me well, for both railway and express companies rewarded me generously in money and advance of position.—Archie Eggleton.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.FIRST-CLASS BRICK FOR SALE.CONTRACTORS AND BUILDERS WILLcontract for brick and stone work forbuilding furnaces, retorts, etc.F

## ADmits THE PARTNERSHIP.

The New York *Tribune* became eccentric over the passage of the repeal bill by the Senate. It proclaimed the result as a Republican victory, but graciously acknowledged that "the Republicans owe their victory to President Cleveland." It admitted the partnership between Republicans and Democrats, and adds that "the Republican Senators put aside all thoughts of partisan advantage and sustained the President loyally and without hesitation."

It seems that a combination was formed between the goldbugs, irrespective of past party affiliations, to repeal the Sherman act unconditionally. The President's advisers, if not himself, knew of this combination and perhaps assisted in negotiating the terms of the alliance. The allied forces knew they were numerically in the majority in the Senate, and that the bill would pass if they could get it to a vote. They declined to make terms with the silver men and would not listen to any compromise proposals. Sherman and Voorhees were aware that twenty-six Republicans and twenty-two Democrats were in the "combine" and that sooner or later they would wear out the opposition force the bill to a vote and pass it.

As it would be ungrateful in the administration not to acknowledge its obligations to the Republicans for the services which they rendered in the contest for repeal, it is stated that no Republican holding Federal office will be supplanted until the end of his term and not then if the Senator or Representative from his State or district was one of the allied forces and voted for repeal.

## THE McCREADY BILL APPROVED.

The McCready bill amending the Geary Exclusion Act has been passed by the Senate without amendment and signed by the President. It extends the time for Chinese registration six months from the date of its passage and defines merchants and laborers so that no mistake need be made in determining to which class a Chinese person belongs. It makes it obligatory upon each Chinese to furnish two pictures of himself when he applies for registration, one of which pictures is attached to the registration book opposite the name of the applicant, and the other is attached to the certificate given the applicant. These precautions are deemed necessary to identify the Chinese and prevent imposition. A Chinese laborer failing to register as prescribed by law will be subject to arrest and imprisonment without bail until deported. It is made the duty of internal revenue officers and United States Marshals to enforce the law.

As the constitutionality of the act has been decided by the Supreme Court of the United States the Six Companies will not have any reasonable excuse for advising Chinese to go to it and as public sentiment, especially on this coast, is in favor of its enforcement, it will doubtless be carried out to the letter. Therefore all Chinese laborers who are legitimately in the United States and desire to remain here, should at the first opportunity get photographs of themselves and register.

## FOR PRINCIPLE, NOT SPOILS.

The Silver men of Humboldt county, and nearly all Humboldters are Silver men, are fighting for principle, not for spoils. They want silver remonetized and are determined that none but Silver men shall get office if they can prevent it being otherwise. Free coinage is the first and great consideration with them and they are asking for no office. The *Silver State* says a Humboldt was in the western part of the State recently and was frequently called aside to talk over the candidates of the Silver party for the various State offices next year, and the question invariably asked him was, "What does Humboldt want?" His reply was characteristic: "Our people went into the Silver party for principle, not for the offices, and I have not heard of any office mentioned out there since the last election."

That the Silver party of Nevada has plenty of first-class material for every office in the gift of the people of the State goes without saying. That from this material a ticket will be selected that will command itself to every good citizen there is no doubt. That the selection will be made by the chosen representatives of the people in convention assembled, not by cliques or rings, is most devoutly to be wished for, and from whatever section of the State the nominees may be selected that they will receive the endorsement and support of every real friend of silver and be triumphantly elected is morally certain.

## A REMARKABLE SESSION.

The extra session of Congress having accomplished the purpose for which it was convened—the repeal of the Sherman law—adjourned without day yesterday afternoon. The session was remarkable in many respects. It ignored the tariff, which we were told was the great issue of the Presidential campaign, and devoted its whole time to the silver question, thereby proving the truth of what the Silver party alleged and the old parties denied, that the free coinage question is the paramount issue of the day. The session was noticeable too from the fact that nearly nine-tenths of the Republicans combined with about one-half the Democrats to carry out the policy of the Administration. It will now be in order for the allied forces to pretend to divide on minor issues and try to make the people believe that the salvation of the country depends upon the success of their respective factions.

## A MYSTERY NO LONGER.

A Terrible Boiler Explosion in the City of New York.

## NO LONGER A MYSTERY.

New Evidence That Henry Planz Arranged His Own Death and Was Not Murdered.

SAN FRANCISCO, November 3.—This morning's *Examiner* publishes the following sensational article:

Henry Planz, tied hand and foot, pockets empty, face hidden in a handkerchief, and hanging by the neck dead from a limb of a pepper tree, gave San Jose a mystery for about a year that has never been cleared up.

For suicide there was no apparent reason, though his employers in the Fredericksburg Brewery thought that a sense of shame at Planz's failure to keep his accounts right had preyed upon his mind. For murder the only provocation offered was the jealousy of other men at Planz's attention to the other sex. Robbery could not have been the motive, for robbers do not take the trouble to tie men to limbs of trees fifteen feet from the sidewalk after they have emptied their pockets.

The mystery and the rewards offered for the detection of the murderers, if Planz was killed by others, induced a score of detectives, professional and amateur, to investigate the case, and at last the missing proof has been supplied. If the document that has been found is genuine, and there is no reason to doubt its character, Henry Planz hung himself from that pepper tree because he was tired of life, because he had made a failure in a position of which he was very proud and because the woman he loved preferred another and told him so.

Those who look upon solutions of mysteries by ratio-calculation and induction with distrust will not now be able to deny that Planz was his own murderer. There is an ante mortem statement extant which in black and white utterly destroys every line. It throws a world of light upon the case. The verbatim text here follows:

"My Dear,—Your note, received to-day, has cut me to the quick. If you knew the trouble that I am in I think even you would have spared me this last blow. Thank God! I will be free from all of you to-night. All I ask of you now is to bury my secret in your heart. It is for you and you alone. But if any one is ever finally convicted of murdering me tell what you know and show this letter. But until then never. Again I implore you to seal your lips: the last request I shall ever make of any human being. Keep out of the way until the excitement is over. And now good-by forever, and may God love you, my girl, better than He has me.

HENRY PLANZ.

## FRIGHTFUL DISASTER AT SEA.

Thirty-Four Lives Lost by the Burning of a Steamship.

HAVANA, November 3.—The steamship City of Alexandria, belonging to the New York and Cuba Steamship Company, from Havana and Mantanzas for New York, has been burned off Cojimar, entailing a loss of life estimated at thirty-four.

The news was brought to this city early this morning when small boat, in which was the second officer and eleven other persons from the City of Alexandria, entered the harbor and reported the loss of the steamer.

They say an explosion occurred yesterday afternoon on board the steamer and shortly after it was burning fiercely. The cause of the explosion is unknown. The fire gained such headway that Captain Hoffman saw it would be impossible to save the vessel and orders were given to abandon the ship. The steamer had 400 hogsheads of rum on board, and this, when it caught on fire, caused an immense mass of flame to ascend from the hatchways, the hatches having been blown off. There was great excitement on board, but the officers soon succeeded in restoring order. As soon as the fire alarm was sounded the crew went to their fire stations and the stewards began to carry provisions to the boats. There was comparatively little sea running, and only slight difficulty was experienced in lowering away the boats, when the bell forward tolled the signal "abandon ship."

The scene of the burning of the steamer was only twenty-five miles from Havana, and the officers in command of the boat had little fear of not reaching that port or some other place along the coast.

In the first moment of terror several men are said to have jumped into the sea. Those who arrived in the small boat this morning said sixty had been drowned, many of them through the upsetting of boats. Later reports, however, show that none of the small boats were upset, and that many of those at first reported as lost reached Bacurano in safety. The number of

persons drowned is now believed to be thirty-four or thirty-five.

When the news of the disaster reached here a number of tugs were sent to the burning steamer to render what assistance they could. Two of these tugs returned this afternoon bringing nineteen survivors of the vessel.

## LOCKED IN AN ASYLUM.

Sensational Charges Preferred Against the Stockton Asylum.

STOCKTON, November 3.—At the meeting of the Police and Fire Commissioners last night a sensation was sprung by a well-known citizen, W. F. Freeman, who appeared before that body and announced himself ready to prefer charges against Chief of Police Henry and the entire police force. He accused the officers of railroading a loan, friendless woman to the insane asylum without the formality of a trial or a proceeding in court of any sort, and intimated that her property had been taken by Deputy Coroner Powers.

Mr. Freeman made the story all the more sensational by implicating in the outrage he described Rev. Father Slavin, assistant to Rev. Father O'Connor.

A careful investigation of the story told by Mr. Freeman shows that his conclusions were too hastily drawn, and that, while it is true that a woman was sent to the Pacific Hospital without being committed in court, there is little room to censure the officers, and no reason at all to find any fault with the priest, who simply acted as a good Samaritan.

## TERRIBLE BOILER EXPLOSION.

NEW YORK, November 3.—Six men killed, several others supposed to be dead under the ruins, a dozen injured, several horses dead and property damaged to the extent of about \$10,000 is the sum total of the havoc wrought by the explosion of a boiler this afternoon in the stables of the Drydock and Battery Street Railway on East Twenty-fourth street.

Without warning about 1 o'clock a terrific crash was heard and the air was filled with bricks, timbers, iron and debris of every description. Escaping steam roared and hissed above the tumult. In a short time, however, it exhausted itself, and through the dust could be seen a picture of wreck and destruction. The destruction of the buildings was complete and terrible. Sergeant Washington Mallin of the Boiler Inspection Bureau says the explosion was caused by over-pressure. Far into the night laborers were at work clearing the wreck away.

## THANKSGIVING PROCLAMATION.

Governor Pennoyer of Oregon Recommons Prayers for the President.

Governor Pennoyer of Oregon is first in the field this year, as he was a year ago, with a Thanksgiving proclamation, which is characteristic of the man who said, "Let the President attend to his business, I will attend to mine."

But here is the document:

"I do hereby appoint the fourth Thursday of the present month as a day of thanksgiving to the Almighty God for the blessings He has bestowed upon this commonwealth during the present year.

"God has indeed been most benificent to our State and Nation, and yet unjust and ill-advised Congressional legislation, having made gold alone full legal tender money, has so dwarfed and paralyzed business that the bounties of Providence are now denied to hundreds of thousands of people within the national domain, who are not only without employment, but also without means of procuring food, raiment or shelter.

"While, therefore, the people of Oregon return thanks to God for his goodness, I do most earnestly recommend that they devoutly implore him to dispose the President and Congress of the United States to secure the restoration of silver as a full legal tender money in accordance with the policy of the fathers of the republic, whereby our industries may be revived, and honest toilers of the land may procure their daily bread not as alms, but as a reward of their labor."

The news was brought to this city early this morning when small boat, in which was the second officer and eleven other persons from the City of Alexandria, entered the harbor and reported the loss of the steamer.

They say an explosion occurred yesterday afternoon on board the steamer and shortly after it was burning fiercely. The cause of the explosion is unknown. The fire gained such headway that Captain Hoffman saw it would be impossible to save the vessel and orders were given to abandon the ship.

The steamer had 400 hogsheads of rum on board, and this, when it caught on fire, caused an immense mass of flame to ascend from the hatchways, the hatches having been blown off. There was great excitement on board, but the officers soon succeeded in restoring order. As soon as the fire alarm was sounded the crew went to their fire stations and the stewards began to carry provisions to the boats. There was comparatively little sea running, and only slight difficulty was experienced in lowering away the boats, when the bell forward tolled the signal "abandon ship."

The scene of the burning of the steamer was only twenty-five miles from Havana, and the officers in command of the boat had little fear of not reaching that port or some other place along the coast.

In the first moment of terror several men are said to have jumped into the sea. Those who arrived in the small boat this morning said sixty had been drowned, many of them through the upsetting of boats. Later reports, however, show that none of the small boats were upset, and that many of those at first reported as lost reached Bacurano in safety. The number of

## KNOWLEDGE

Brings comfort and improvement and leads to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession because it acts on the kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

## DIED.

SMITH—In Pleasant Valley, Washoe county, Nevada, November 3, 1888, George Smith, aged 77 years, 6 months and 14 days.

SMITH—In Pleasant Valley, Washoe county, Nevada, November 3, 1888, Sarah Smith, aged 63 years and 11 months.

The funeral will take place from Odd Fellows Hall, Washoe city, at 11 o'clock A. M. tomorrow (Sunday). Friends and acquaintances are respectfully invited to attend.

## STATE OF OHIO, CITY OF TOLEDO, LUCAS COUNTY.

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, Ohio, and that he is the sole owner of the firm, which will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the new HALL'S CATARRH CURE. I, FRANK J. CHENEY, Swear to before me this 15th day of December, A. D. 1893.

A. D. GLABSON, Notary Public.

His Cure取 Care is taken internally and directly on the blood and nerves of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

When Baby was sick, we gave her Castoria. When she was a child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

## NOTICE TO CREDITORS.

From 8:30 A.M. to 6 P.M. Sundays from 9 to 10 A.M.

### BREVITIES.

Miss Blanche Davis of Carson is visiting friends in Reno.

Mrs. J. L. Wines arrived from the west yesterday morning.

D. A. Bonder came down from Carson on yesterday's local train.

R. L. and J. M. Fulton returned from San Francisco yesterday.

Plumbing, tinning and pipe work neat and cheap at Lange & Schmitt's.

W. R. Chamberlain and wife have returned from their visit to Plumas county.

Governor Colcord and his wife and daughter arrived from Carson last night.

Evan Williams passed through Reno from San Francisco yesterday on his way to Carson.

Tremor Coffin, the Carson attorney, left for Quincy yesterday morning on legal business.

Archie McDonell and Alex McCone of Virginia arrived last evening on their way to California.

Charles Stoddard came down from Steamboat yesterday to attend some Midwinter Fair matters.

J. Cairn Simpson, the well known writer on horse matters, is visiting Theodore Winters, at Washoe Valley.

Captain Frank Bryant of the Carson Guard arrived in Reno yesterday from Ogden and continued on to the capital.

The Salvation Army will give a coffee supper at their Barracks on Virginia street near the iron bridge this evening to which everybody is invited.

Willie Cahill, the youngest son of Mr. and Mrs. Wm. Cahill, died at Carson yesterday. The young man was aged 18 and a member of the Carson guard.

The Lassen Man has entered upon its eighth volume. It was burned out at the time of the Susanville fire last summer, but appears all the brighter for that.

Five empty passenger coaches were attached to an east-bound freight train which passed through Reno yesterday. They go East empty and return West loaded.

George D. Winters shipped six carloads of sheep to H. Levy, San Francisco yesterday, five carloads to E. Avery, San Francisco, and one carload to E. Avery, Stock Yards.

Mrs. Fred Dassonville, the lady who conducts the resort of that name on the shores of Donner Lake during the summer months, has arrived in Reno and will spend the winter here.

The Southern Pacific Railroad Company announces that it is about to do away with its 2½ cent rate between Oakland and San Francisco and restore the 5 cent rate on its ferry boats.

The Parsons murder case was submitted to the jury at 3:30 o'clock yesterday afternoon, and the Carson Tribune says at the time the paper went to press the jury had not returned a verdict.

Storm and Warm Waves—Theories of Storms—Auroral Displays and Sun Spots.

Copyrighted 1893 by W. T. Foster.

St. Joseph, Mo., Nov. 4, 1893.

My last bulletin gave forecasts of the storm wave to cross the continent from the 5th to the 9th, and the next will reach the Pacific coast about the 10th, cross the western mountains by the close of the 11th, the great central valleys from the 12th to the 14th, and the eastern states about the 15th.

The warm wave will cross the western mountains about the 10th, the great central valleys about the 12th, and the Eastern States about the 14th. The cool wave will cross the western mountains about the 13th, the great central valleys about the 15th, and the Eastern States about the 17th.

Very severe storms may be expected to cross the continent from November 16th to December 9th.

It is surprising to see how many readers confuse my forecasts with those of the national weather bureau. I have nothing to do with anything dated at Washington, and cannot afford to be held responsible for anything more than my own errors. Give me planetary Meteorologists fair critics, and we are always ready to compare our long range forecasts with the short range forecasts of the national weather bureau notwithstanding their government aid of over two thousand dollars a day.

Too many readers overlook the conditions under which my forecasts are made. All should remember that the weather changes are expected within twenty four hours of sunset of the day named, and therefore not necessarily on that day.

### CURRENT THEORIES OF STORMS.

Prof. Bigelow, of the national weather bureau, says: "That the meteorological system is somewhat dependent upon the coronal magnetic field, hardly admits of further doubt, and consequently there is grounds for the modification of the current theories of storms."

That is the first time that anybody connected with the national weather bureau has admitted a possibility that planetary Meteorologists have the correct theory as to weather changes, and now it is stated in the public press that his investigations are to be discontinued by the department of agriculture.

In another paragraph Prof. Bigelow says: "Storms tend to accumulate, and severe weather is most frequent after the 3d, 11th, 17th, 22d and 26th days. Herein is an admirable source of long range weather predictions in general terms." This quotation is somewhat remarkable, coming from his high and responsible authority. Starting with what he calls the 3d day and counting to the 26th is twenty-three days, and counting the first as one, this twenty-three days exactly covers five of my storm waves, not widely differing from the five disturbances mentioned by him.

But Prof. Bigelow will not be permitted to follow up this work, for with a long range system of forecasts perfected, the dealers in cereal options would have no great advantage over the Agriculturalists, and the former are so powerful a position in secure when they desire to get an objectional person out of what they consider their field of operations.

### MAGNETIC INFLUENCES.

The facts as to magnetic influences of the sun on our earth were not obtained by Prof. Bigelow by examining the sun, but from the records of magnetic action at various places all around and on the earth, therefore it is only a theory with him as to the sun being the sole cause of these magnetic disturbances. I believe him to be in error as to some portions of his theory on which he has no proof. His idea is that there are places on the sun that send out great magnetic disturbances, and that these develop the earth at intervals, because of the rotation of the sun on its axis. Prof. Tice held that a new, or undiscovered, planet called Vulcan is the cause of these magnetic disturbances. When the truth is known, all the planets will be found to have something to do with these magnetic throbs, or heartbeats of the solar system.

The difference between the investigations made by Prof. Bigelow and those made by planetary meteorologists is, that he has taken the recorded changes in magnetism, and found that this force comes to the earth in periodic waves, while we have taken the weather records for many years, and found that great weather disturbances have come and continued to occur coincident with certain positions of the sun, moon, and planets, these positions being such as, according to the laws of magnetism, would cause magnetic and weather disturbances on the earth. We have also found that sun spots, magnetic storms, great weather events and the magnetic disturbing positions of the sun and planets are coincident. Therefore we hold that it is the planetary positions that cause all these disturbances through magnetic or electromagnetic influences.

### AURORAL DISPLAYS AND SUN SPOTS.

Prof. Weeder of Lyons, N.Y., has recorded the auroral displays, and has demonstrated that they are coincident with the sun spots. Prof. Bigelow finds that the sun spots, or the rotation of the sun, coincides with the magnetic throbs on the earth, and planetary meteorologists have demonstrated that weather changes are coincident with sun spots, aurora, and certain positions of the sun and moon and planets relative to each other.

Out of these facts is being evolved

ABSOLUTELY PURE

the new meteorology. The subject is one of many and great difficulties, but that which is easily obtained is of but little value.

The progress now being made on this and many other questions of great importance is greatly indebted to the newspapers and very little to orthodox scientists. Independent, liberty-loving thinkers, reach the people through the daily and weekly press, and public opinion soon forces the orthodox scientists out of their old rutts.

As never before, the world is honeycombed with new thought, and the old being rapidly turned down. Not only in scientific matters is this true, but in all that relates to man. Why this wonderful bound, this swift flying new thought as if on the wings of a Mercury?

This age of electricity and of electric thought may be the result of a great magnetic equinox, which, if the unknown of the universe is patterned after the known, must occur at intervals of about 13,000 years, when our solar system passes its equinox with the great center around which it moves in about 2600 years.

### TELEGRAPHIC NOTES.

A locomotive on the Iron Mountain road exploded near St. Louis, killing the engineer, fireman and brakeman. A report sent out from Washington yesterday that a crank attempted to kill the President was wholly unfounded.

The Senate did not act on the nomination of Judge Hornblower of New York to be Justice of the Supreme Court, so there is still a vacancy on the Bench.

Creditors of the Con. Wellston Coal and Iron Company of Ohio ask that a receiver be appointed, as the company has defaulted on the interest on \$5,000,000 bonds since 1888.

The Canard steamer, Campagna, made the passage from New York to Queenstown in 5 days, 12 hours and 7 minutes, beating the best previous record 1 hour and 23 minutes.

The second trial of Daniel Caughlin, an ex-detective, for complicity in the murder of Dr. Cronin, was commenced in Chicago. Caughlin was convicted at the first trial and sentenced to life imprisonment, but was granted a new trial by the Supreme Court.

The President yesterday signed the following bills: Extending for six months the time in which Chinese can register under the Geary law, the New York World's Fair bill and the bill giving the model battleship at the World's Fair to the State of Illinois.

M. B. Curtis, "Sam'l of Posen," who was tried for the murder of Policeman Grant in San Francisco, is wanted by the authorities as a witness in the case of "King" McManus and Senator Dunn of San Francisco, who are accused of bribing the jurors who tried him. Curtis is supposed to have gone East in disguise.

A dispatch from Cadiz, Spain, says that a fleet of fifteen war ships has been gathered at Gibraltar in anticipation it is presumed, of a combined movements of ships of Russia, France and Spain toward Tangier. It is also reported that the French and Russian squadrons intend to proceed immediately to Tangier and join the Spanish vessels there.

### STATE PRISON STATISTICS.

The Carson Tribune gives the following State Prison statistics: Number of prisoners on hand September 30, 1893, at State Prison, 88; received during October, 5; total, 93; discharged during October, 4. On October 31 there were on hand 89—State prisoners, 69; United States prisoners, 20. Average for month, 88-10-31.

### IN OLDE TIMES.

People overlooked the importance of permanently beneficial effects and were satisfied with transient action, but now that it is generally known that Syrup of Fig will permanently cure habitual constipation, well-informed people will not buy other laxatives, which act for a time, but finally injure the system.

### REVIVAL SERVICES.

Revival services are being held each evening at the Congregational Church. All are invited.

### Guaranteed Cure.

We authorize our advertised druggist to sell Dr. King's New Discovery for Consumption, Coughs and Colds, upon this condition. If you are afflicted with a Cough, Cold or any Lung, Throat or Chest trouble, and will use this remedy as directed, giving it a fair trial, and experience no benefit, you may return the bottle and have your money refunded. We could not make this offer did we not know that Dr. King's New Discovery could be relied on. It never disappoints. Trial bottles free at S. J. Hodgkinson's drug store. Large size 50¢ and \$1.

### A Leader.

Since its introduction, Electric Bitters has gained rapidly in popular favor, until now it is clearly in the lead among pure medicinal tonics and alternatives—containing nothing which permits its use as a beverage or intoxicant, it is recognized as the best and purest medicine for all classes of the system. It cures Liver Complaints. It will cure Sick Headache, Indigestion, Constipation, and drive Malaria from the system. Satisfaction guaranteed with each bottle or the money will be refunded. Price only 50¢ per bottle. Sold by S. J. Hodgkinson.

### HAMBURG.

It's sound old fashion, and expresses just what you meant, after having purchased something of no account. Now there is no humbug about Simmens Liver Regulator. Some imitation or substitute may be offered you instead, but none will give the relief from Indigestion, Diarrhea, and Biliousness like the genuine Simmens Liver Regulator. You know it by the Z on the package, and the relief it gives.

### FOR OVER FIFTY YEARS.

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. It disturbed at night and broken by your rest by a sick child suffering and crying with pain of cutting teeth, set aside at once and get a bottle of Mrs. Winslow's Soothing Syrup for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures Diarrhea, regulates the Stomach and Bowels, cures Wind Colic, softens the gums, reduces Inflammation and gives Tone and Energy to the whole system. Mrs. Winslow's Soothing Syrup for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

# "German Syrup"

Here is something from Mr. Frank A. Hale, proprietor of the De Witt House, Lewiston, and the Tontine Hotel, Brunswick, Me. Hotel men meet the world as it comes and goes, and are not slow in sizing people and things up for what they are worth. He says that he has lost a father and several brothers and sisters from Pulmonary Consumption, and is himself frequently troubled with colds, and he

**Heredity** often coughs enough to make him sick at **Consumption** his stomach. Whenever he has taken a

cold of this kind he uses Boschee's German Syrup, and it cures him every time. Here is a man who knows the full danger of lung troubles, and would therefore be most particular as to the medicine he used. What is his opinion? Listen! "I use nothing but Boschee's German Syrup, and have advised, I presume, more than a hundred different persons to take it. They agree with me that it is the best cough syrup in the market."

## PROFESSIONAL CARDS.

DR. E. C. PHELPS.

DENTIST—OFFICE IN BANK OF NEVADA'S new building, Reno, Nev.

All operations in MODERN DENTISTRY skillfully executed at reasonable rates and satisfaction guaranteed.

OFFICE HOURS—9 A. M. to 5 P. M.

DRS. PHILLIPS & PHILLIPS PHYSICIANS AND SURGEONS.

OFFICE—New Nevada Bank Building, Room 3, 4 and 5.

Dr. W. A. PHILLIPS—Office hours, 8 to 10 A. M. and 1 to 3 P. M. Residence, Corner Sierra and Virginia streets, Reno, Nev.

Dr. F. T. PHILLIPS—Office hours, 10 to 12 M., 3 to 4 and 7 to 8 P. M. Residence, West street, second house north of railroad.

BENJAMIN F. CURLER,

ATTORNEY AT LAW.

DISTRICT ATTORNEY

WASHOE COUNTY.

OFFICE AT COURTHOUSE.

WM. WEBSTER,

ATTORNEY AT LAW:

RENO, NEVADA.

OFFICE—First National Bank Building, upstairs.

T. K. STEWART.

SURVEYOR AND CIVIL ENGINEER.

UNITED STATES MINERAL DEPUTY.

OFFICE—Virginia street, Reno, Nev. Janit.

DR. H. H. HOGAN,

PHYSICIAN AND SURGEON.

Office hours from 9 A. M. to 5 P. M. daily.

Office and residence on Center street, near First, Reno, Nevada.

H. L. FISH,

NOTARY PUBLIC AND CONVEYANCER.

Deeds and other papers drawn and acknowledged taken at reasonable rates.

OFFICE—In First National Bank.

F. M. PAYNE,

PIONEER HOUSE MOVER.

Twenty years' experience in Nevada.

Will attend to orders from outside towns.

Referrals from Carson, Hawthorne, Wadsworth, Amdee and other places.

Office: West street, P. O. Box 176, Reno, Nevada.

ROBT. M. CLARKE,

ATTORNEY AT LAW.

RENO OFFICE—Virginia street, in Pow-

ing's new building.

D. W. RULISON, D. D. S.

DENTIST—Graduate of the College of Den-

tistry, formerly with and successor to Dr. May A. Greenlaw.

Practicing Physician.

Office hours from 8 A. M. until 5 P. M.

Nitrous Oxide Gas administered for the painless extraction of teeth. All operations in dentistry skillfully performed and satisfaction guaranteed.

CHAS. A. JONES,

ATTORNEY AT LAW.

RENO, NEVADA.

ELLOING 1,300 MILES

LONG DISTANCE AND SHORT CIRCUIT TELEPHONES.

who Use the Former and What They Use

Them For—The Charges Seem High, but

They Permit the Use of Considerable

Conversation—A Lecture For Test Calls.

A continuous long distance telephone line extends between Boston and Milwaukee, a distance, as the line is run, of 1,300 miles.

A reporter who was wondering, as many other people are wondering, no doubt, if the long distance telephone circuits are much used, and if so by what class of people and for what purposes, called to ask those questions of Edward P. Meany, assistant general manager of the company, in the main office, at 18 Cortlandt street.

"Yes," said Mr. Meany, "the long

distance service is used, to such a satis-

factory extent that it is being constantly

extended. In the far western part of

our territory Milwaukee has been added

to the system, and this side of Chicago a line has recently been run down from

Toledo to Dayton O., and from Dayton

extensions are making which will bring

Cincinnati and Indianapolis into the service.

"What class of interviewers is most

conducted over the longer circuits?"

"I should say that social and domestic

affairs bring most of the patrons now,

although there are some business inter-

views conducted."

Mr. Meany explained that the charges

for long distance interviews are based

upon five minutes' conversation as a

unit. That is, the charge between New

York and Washington is \$2, between

New York and Chicago \$0, for each five

minutes or portion of that time. This

does not include the time used in mak-

ing the connection or bringing the par-

ties to the ends of the line. All sub-

scribers to the long distance telephone

can be connected with the circuits just

as they are in the local business. If a

man is wanted who is not a subscriber

to the long distance service, he is hunted

up and brought to a central station

without charge.

When two people get fairly started on

a long distance interview, they can talk

from 400 to 600 words in five minutes,

according to the subject and their fami-

liarity with it. It is a fact that most in-

terviews end before the unit of time has

elapsed. One New York woman who

had her son at South Bend, Ind., where

he is at school, called up anxiously, asked

her started hopeful if she had put his

winter flannels in his trunk, if he had

not maliciously carried off his father's

razor and if his tooth had stopped ach-

ing. Being satisfactorily answered on all

these points, she paid for the service

and went on her way rejoicing.

Business men chiefly use the long dis-

tance service to consult about terms of

contracts or to report the text of con-

tracts which must be repeated to insure

accuracy.

The chief difference between the long

distance and the short circuits is that in

the former what is called a metallic ser-

vice is used—that is, in talking between

New York and Chicago, a distance of

1,000 miles, the service is really over 2,000

miles of wire, as the wire, instead of be-

ing grounded at both ends to complete the

circuit, is doubled or looped to make the

the complete circuit metallic. The in-

structions for speaking and listening are

the same as those printed for the use of

the ordinary telephone, and the result,

so far as hearing is concerned, is rather

better over a thousand miles than over one.

This is owing to the metallic cir-

cuit, which does away with the maddening

burr-r-r resulting from induction

and from the use of a heavier and su-

perior copper wire. The wire used in

the long distance service weighs 870

pounds a mile, the ordinary service wire

weighing but 340 pounds.

Mr. Meany said that while there was

no mechanical reason why the service

should not be continued across the con-

tinent, it is not probable that, for the

present at least, it will go beyond the

Mississippi river, owing to the great cost

of construction, operating and mainte-

nance expenses. When these facts had

been given to the reporter, Mr. Meany

asked if a chat with Chicago would not

aid an understanding of the subject. The

reporter thought it might, and Mr. Meany

drew toward him a movable stand-

ard telephone
